

Amir Hattab

Mostaganem, Algeria | amirhattab2018@gmail.com | 0655206259 | amirhattab.vercel.app | github.com/AmirtterK

Summary

Full-stack developer building mobile and web applications. Founder of Krii, a peer-to-peer rental marketplace for Algeria, and an AI-focused Master's student with a strong foundation in software architecture and real-time systems.

Experience

Founder & Full-Stack Developer, Krii

Nov 2025 - present

- Built and deployed a production peer-to-peer rental marketplace with mobile, web, and backend infrastructure.
- Led end-to-end product development across the customer app, admin moderation dashboard, and backend systems.
- Implemented payment processing, real-time notifications, and a multi-tenant database architecture.

Flutter Workshop Instructor, Mobile App Development Workshop

- Taught practical Flutter mobile app development, guiding participants through app structure and implementation.

Projects

Krii

Peer-to-peer rental marketplace for the Algerian market.

- Built the mobile app, admin dashboard, and backend platform with payments and real-time notifications.

Chat App

Cross-platform messaging application with real-time synchronization, push notifications, and a custom backend.

- Flutter, Express, Firebase | github.com/AmirtterK/Chat-App

E-commerce Platform

Full-stack e-commerce system with cart, order management, and OAuth authentication.

- Next.js, TypeScript, MongoDB, Clerk | github.com/AmirtterK/e-commerce

Chess Game

Two-player chess game with AI opponent and move validation.

- Flutter | github.com/AmirtterK/Chess

Ferrari Website

Interactive 3D showcase website with animations and immersive design.

- JavaScript, Three.js | github.com/AmirtterK/Ferrari-website
